

Relationships and Sex Education (RSE) Day

It begins with me

Self Love Camera

You will need:

- Camera and snapshot templates printed onto card
- Colouring pens or pencils
- Hole punch or sharp pencil
- Piece of long string per camera

Instructions:

1. Colour in the camera and make it as cool and fun looking as you want.
2. Now design some photos that you'd like people to see and know about you. These might be pictures of your most special moments, a selfie, pictures with friends or they might be words and phrases that sum you up. There are some templates on page 4 that you can use to stick on the snapshot frames and colour in if you need some ideas.
3. Punch two holes at the top of the camera (not too close to the edge) if you would like to wear it round your neck. Attach the string to these holes.
4. Cut a slit in between the long black lines of the camera. You can now feed your snaps through here and share them with friends just like a real instant camera!
